FMS Calculator -

is a user friendly drive/work/rest validator for the National Driving Hours Regulations. The development of this validator program has incorporated significant input by enforcement agencies and transport operators. The FMS Calculator provides confidence you, your team and company are doing the right thing.

Invalid Shift

Buttons: Submit, Chart 30 days, Hide Database, Review Database

Attributes of the Program:-

- Metro and long distance drivers
- Basic and TFMS
- Tamper proof 365 day database
- Simple hh.mm input
- Validate accuracy to within 1 min
- Calculates next 7/14 day hours
- Incident (CAR) reporting
- Management Reporting
- Certificate of Use (for your customer)

Benefits:

- Provides solid tamper proof evidence
- Simple system with low compliance cost
- Management by exceptions – data entry by non-critical personnel
- Peace of mind, reasonable steps defence!

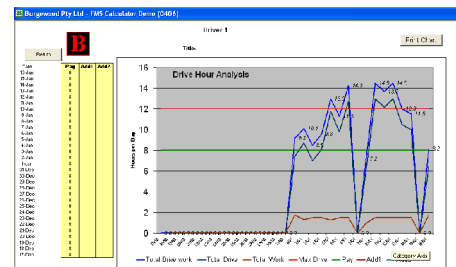

- Covers the whole regulation – metro, long haul, permanent and casual
- Can show your customers you provide a working system - to protect them
- Available Hours– analyses all drivers and shows how many hours are available for the next 6 days including 24 hour breaks – a sensible planning tool!

What do you need to run it?

- Any computer with Excel®
- Anyone who uses Excel®
 - e.g. receptionist
- About a 15sec per driver
- No special equipment
- No in depth or costly training
- No expensive software

Charting provides management with quick easy audits.

This can also be cross-referenced to pay etc. and allow management to make and be seen to make informed decisions to correct errors – a reasonable defence

Burgewood Pty Ltd installs the program, trains your personnel, offers free help desk and upgrades – including those required by regulation changes
